# SODA PHOTO FOUNTAIN

CONTENTS

HELLO FRIEND

I'm Mysi (pronounced "Missy")!

Over the past 13 years, I've photographed ruffians and artists and weirdos and business people alike. It's been torturous and beautiful and full of emotion and light. And I don't plan on stopping anytime soon.

I am on this earth to photograph the raw, explosive emotion and the raucous JOY that surrounds two people when they dare to show the world their love!

When I'm not hiding behind my camera, you can find me cuddling my partner and our 3 dogs, reading fantasy novels, running by the ocean or eating everything in sight.

SERVICES & PRICE GUIDE

HOW I SHOOT WEDDINGS

My photography is fun, candid, random-yet-deliberate, unconventional and full of explosive color and emotion.

South Asian Weddings are chaotic and flavorful and filled with endless faster-than-light moments.
And that's my whole vibe.
I am a chaos curator and flavor saver.

My style is 99% unposed. I don't spend a lot of time telling people what to do… I operate in stealth and capture the magic as it happens.

My goal is to document you and your LOVE, candidly, unabashedly, artfully.

 TL;DR
Let's just frolic the F around, make beautiful shit, and have a damn blast.

Our photos are so full of life and every moment was captured with true brilliance. The **subtleties**. The **colors**. The **quality**. Everything turned out better than I ever could imagine.

By the end, it really felt like I had hired a best friend I didn't know I had. And the end product was everything we wanted, from **sci-fi** action thriller to achingly beautiful **art** shots.

It's not just that she has the eye, and it's not just that she has the skill—it's that she gets to the **heart** of the matter. The **quiet** moments, the **loud** ones, the **irreverent**, the **unforgettable**.
Just book her, already.
-S+L

We were **tough** clients with a lot of special requests and unique situations, and Mysi just crushed it.
-S+G

You should never hesitate to trade your **cow** for a handful of **magic** beans.
